Mail Account

Type the name by which you would like to refer to these servers. For example: "Work" or "Windows Mail".

Jo Bloggs - Spitfire POP3

User Information

Name: Jo Bloggs

Organization:

E-mail address: Jo.Bloggs@spitfireuk.net

Reply address:

Include this account when receiving mail or synchronizing

OK Cancel Apply

Click the Servers tab

Check the incoming and outgoing mail servers and change if required.

ONLY if you have 217.13.128.18 in either of these boxes should you change them.

The screenshot shows a Windows-style dialog box titled "Jo Bloggs - Spitfire POP3 Properties". It has five tabs: "General", "Servers", "Connection", "Security", and "Advanced". The "Servers" tab is selected. The dialog is divided into three sections:

- Server Information:** A dropdown menu shows "POP3" selected. Below it are two text boxes: "Incoming mail (POP3):" containing "217.13.128.18" and "Outgoing mail (SMTP):" containing "217.13.128.18". A large red "X" is overlaid on these two boxes.
- Incoming Mail Server:** Includes an "E-mail username:" field with "Jo.Bloggs@spitfireuk.net", a "Password:" field with seven dots, a checked "Remember password" checkbox, and an unchecked "Log on using Secure Password Authentication" checkbox.
- Outgoing Mail Server:** Includes an unchecked checkbox "My server requires authentication" and a "Settings..." button.

At the bottom of the dialog are three buttons: "OK", "Cancel", and "Apply".

If you have changed the settings click OK, close and then try sending and receiving your email.
