

Spitfire IP engineering expertise on show at IP Expo

29 September 2015

At IP Expo Spitfire, the leading business Internet telephony service provider and ISP, is demonstrating its multi-award winning SIP Communicator™ hosted telephony service. Also shown on the stand is the 3CX telephony platform, a Windows based IP softswitch that has been developed specifically for Microsoft Windows and is based on the SIP standard.

Spitfire is one of the first UK providers to offer the 3CX telephony platform as a hosted solution. This eliminates most of the capital expenditure usually required for server and licenses as only handsets are now required. Spitfire is also a 3CX supported SIP trunk provider, with Spitfire SIP trunk configuration built into the latest release of 3CX software.

Spitfire's own SIP Communicator™ hosted telephony service only requires SIP compatible handsets, making the service an extremely cost-effective solution for business start-ups and small businesses that are growing and anticipate moving premises or are spread over multiple sites. For larger enterprises SIP Communicator™ is the ideal solution for staff working remotely from home as they have full access to phone system functionality, just as if they were in the office. Larger businesses also benefit from the disaster recovery potential of SIP Communicator™.

Visitors to the Spitfire stand can also discuss Spitfire's SIP Trunk service. Designed as an ISDN30e and ISDN2e replacement, Spitfire's SIP Trunks offer business quality secure telephony at typically up to 50 per cent less than the monthly rental cost of an equivalent ISDN service. As one of the only ISPs and fixed line operators to offer a SIP Trunk service, Spitfire offers a complete end-to-end SIP service via its own IP and TDM infrastructure.

For data connectivity Spitfire offers a range of Ethernet connectivity options providing customers with next-generation-network broadband access. This includes a new GEA Ethernet option offering the same performance SLAs as EFM (Ethernet First Mile) and Fibre Leased lines, but at a cost effective price.

Potential reseller partners visiting the show can benefit from Spitfire's Partner Service offering outstanding technical support and assistance for IT companies wishing to offer their clients voice and data network services.

For Spitfire, Tom Fellowes, Sales Director stated, "We have a range of IP voice and data solutions to discuss with visitors to our stand at IP Expo. Spitfire offers customers advanced IP engineering expertise and we anticipate strong interest in our solutions on the Spitfire stand."

Ends.
