

SIP
 Communicator™

Spitfire SIP Communicator™

A multi-award winning business grade hosted phone system which is delivered over Spitfire's SIP network. Designed to be used by small and medium sized businesses that need a modern feature rich communicator solution at a competitive price.

The Monarch Butterfly flies over 4,000 while migrating. SIP Communicator™ - Spitfire's hosted PBX, enables your staff to work anywhere with lower costs.

How does it work?

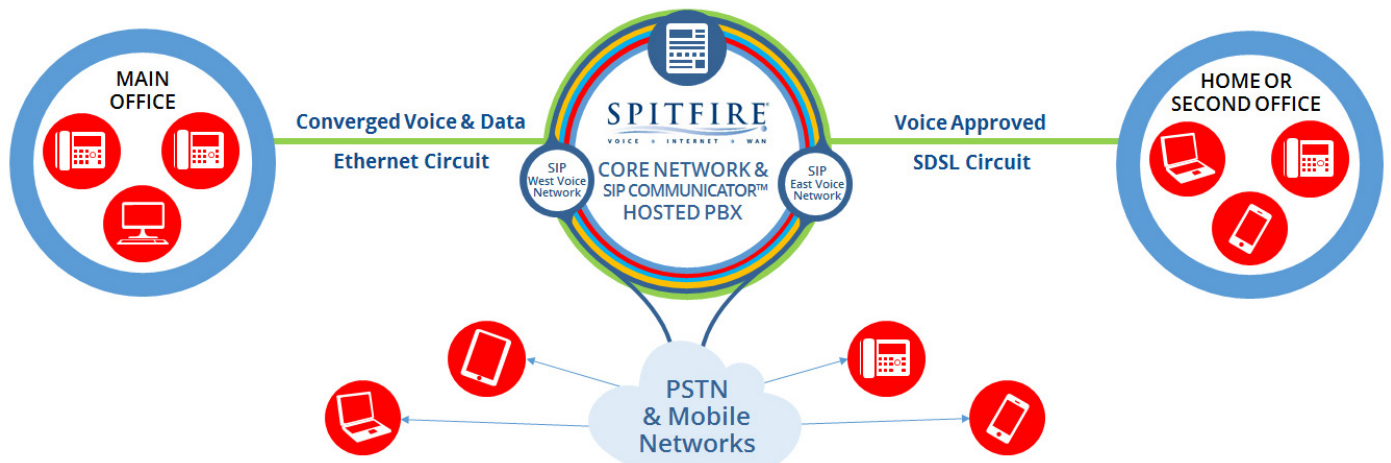

Spitfire's SIP Communicator™ is hosted within our secure core network. As a cloud based deployment this offers a straightforward installation with low set-up costs.

Calls are delivered to the telephones at your site or elsewhere using Spitfire's own Voice Approved data circuits providing assured end to end business grade call quality.

How can Spitfire help?

The SIP Communicator™ is a fully managed and scalable system. This allows you to focus on your business, safe in the knowledge that your phone system can grow as you do.

Combined with Spitfire's SIP network, our hosted telephone system offers end-to-end reliability and quality, which thousands of users rely on to run their businesses every single day.

Key Benefits

With Spitfire SIP Communicator™ each customer benefits from a feature rich business phone system provided within a simple per user, per month cost.

Voice quality assured, by design

We understand that poor voice quality is not acceptable for a business telephony system, and quality can only be assured with appropriate connectivity.

Spitfire SIP Communicator™ connects via Spitfire SIP trunks, while Spitfire Ethernet and Voice Approved Broadband circuits are recommended for connectivity to the customer premises.

By using these components, the public internet is avoided and Quality of Service (QoS) assured from the customer premise right through to the telephone network.

FULL IP PBX FEATURES

- Fully flexible call routing and re-direction
- Conference bridge facility
