Spitfire Hosted PBX 2.1

Our latest fully featured cloud hosted telephony solution is easy to use and manage. It comes with the ability to add telephone extensions whenever and wherever you need as part of a single or multi-site solution.

Easy to self-manage. From £6 per extension per month.

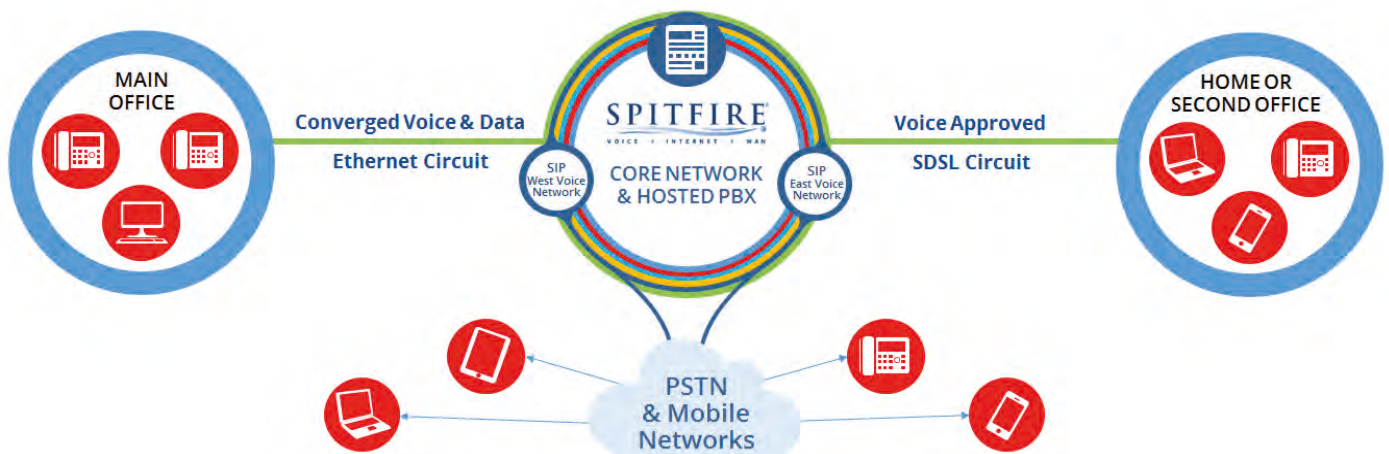

Barnacle Goose
[Branta Leucopsis]

Barnacle Geese migrate twice a year, sometimes travelling over 3,000 miles in search of warmer climates. Free migration to Spitfire's Cloud hosted telephone system.

- Circuits for assured call quality
- Inbound & Outbound call resiliency included as standard

SECURE

- Hosted PBX 2.1 located in one of Spitfire's secure core network nodes
- Resiliency in server architecture
- Core network node deployed with full power

Why Spitfire?

Spitfire's Hosted PBX 2.1 provides full flexibility and scalability. Extensions are not restricted to a physical location, so a single extension can be used by staff who are spread across multiple locations - or indeed at home or connected by Wi-Fi. By using Hosted PBX 2.1 on smartphones, tablets, PCs or Macs, the phone system can be utilised from wherever your staff need to work from.

A mobile user with an internet connection will simply work as if they were at their desk, with the added benefit of calls to other extensions being free – so no more diversion charges for home or remote workers. As your business grows, simply add another extension and connect a softphone or handset. No need for additional server hardware or licences.
