FTTP Information Sheet

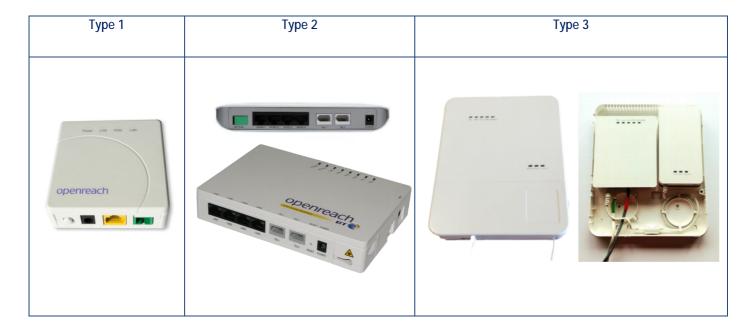

Technicolor DWA0120 (model may vary)

Network cable

Openreach Optical Network Terminal (ONT) types - varies from premises to premises...

Type 1	Type 2	Type 3

Setup Instructions:

Use the network cable to connect from the Technicolor WAN port
to the Openreach ONT that was fitted as part of the original installation.

Spitfire Default Wi-Fi Configuration: the SSID and security key are detailed on the label on the reverse of the router. However, for routers configured no-NAT, in Bridge Mode, or for circuits in Spitfire's SIP VRF, Wi-Fi is deactivated by default. If a customer has requested a custom Wi-Fi SSID and security key then please note that this will differ from those detailed on the reverse of the router.
