Specialists in business-class Wide Area Networking, Internet connectivity and SIP Voice over IP

Working from Home

Enabling Effective Home-Working

The importance of the ability to work from home effectively has been placed front and centre during lockdown, and that doesn't look like it's going away any time soon.

Work at Home. Keep in Touch. Stay Connected.

Betta fish construct bubble nests as safe havens for their young, creating a perfect environment for success. Create your own perfect environment for success with our Working from Home Solutions.
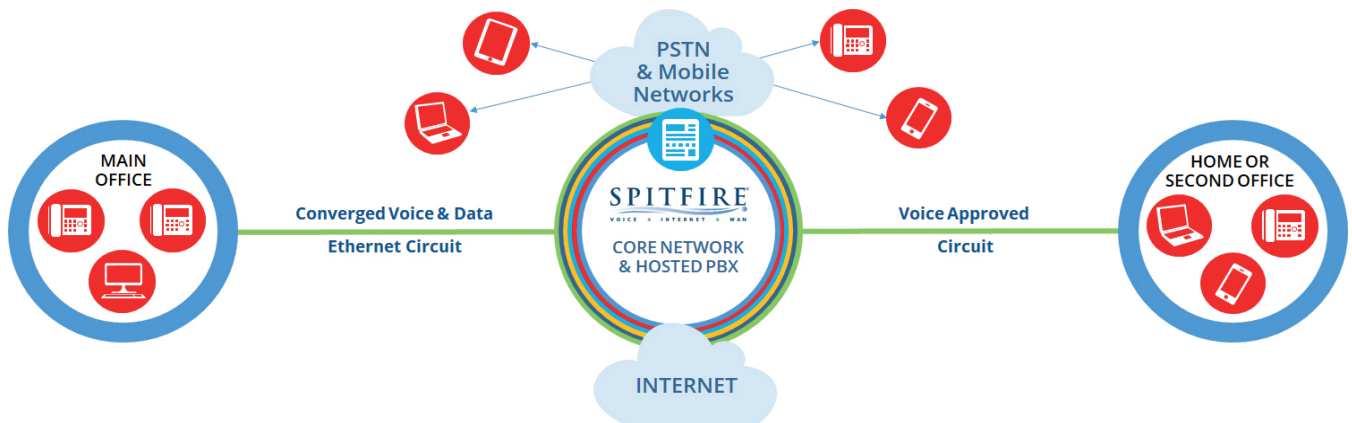

New business challenges

Creating an effective working environment for a decentred workforce throws up new challenges:

- Management and productivity of remote employees

- Remotely accessing IT systems and software using unsuitable and often insecure connectivity

- Enabling a flexible workforce that can seamlessly move between home and office and quickly react to changes in government advice and restrictions

Where do I start?

Spitfire has a range of products that enable businesses to tackle each of these issues, ensuring that staff productivity is maintained or even enhanced. Remote staff are supported by the right tools and connectivity to maximise their efficiency whether at home or in the office. This is not a one size fits all solution and you need Spitfire to help build a solution that is going to serve your business effectively.

With a team of Cisco-Accredited Account Managers we will seek to understand in detail what issues your business faces and build you a solution to fit.

Key Benefits

Effective communication is essential to successful remote working.

A centralised hosted phone system and business quality connectivity will give your business an advantage, not hinder your workforce.

CLOUD PHONE SYSTEMS
- Effective call flow management
- Reporting & Recording
- Flexibility for moving between the home and the office
- Seamless continuity with soft-phones, mobiles or handsets

BUSINESS GRADE BROADBAND
- High speeds for both fixed lines and mobile data
- Industry leading SLAs
- Dedicated connections
- Business only core network
- Designed for quality VoIP calls

SECURITY AND NETWORKING
- Optimising your ability to manage home and office connections
- Extending your wide area network to homes with MPLS
- Centralising remote user security with Firewall as a Service (FWaaS)

CONSULTATIVE APPROACH
- Understanding your unique requirements and challenges
- Recommendations to help reach and exceed your goals
- Providing the right solution

Why Spitfire?

Spitfire have over 10 years of experience of delivering complex solutions to our customers.

We can support you on every step of the journey from the initial design, migrating to a new platform and providing ongoing support.

Our business only network is designed from the ground up to deliver high quality IP telephony. Spitfire's award winning solutions are backed by market leading SLAs and supported by our UK based support team.

Speak to your Account Manager about effectively enabling your remote workforce.

Work at Home. Keep in Touch. Stay Connected.
