

## Connectivity

# Mobile Broadband

Struggling with poor speed? Need to add resiliency to your existing set up? Need new connectivity quickly?

Look no further than our Mobile Broadband solutions! Utilising the wide ranging networks of O2, Vodafone and EE, Mobile Broadband provides you with excellent speeds, deployed much faster than traditional fixed line connections

Arctic Tern  
[Sterna paradisaea]

*Arctic Terns see more daylight than any other animal, annually migrating from pole to pole. Our Mobile Broadband offers light at the end of the tunnel for challenging connectivity*

## What is Mobile Broadband?

Utilising the O2, Vodafone and EE wide ranging mobile data networks, we offer Mobile Broadband as a wireless mobile data solution giving you a genuine alternative to a fixed line Internet service

The Mobile Broadband service is provided with a 4G/4G+ or 5G router, pre-configured to your specification and ready to connect your local network to the Internet. Simply power on the router and connect via WiFi or connect it to your switch for simple, fast Internet access.

If preferred, a SIM only option is available for deployment into your own router or IoT device. All of our SIMs are pre-activated and ready to use.

## Who is Mobile Broadband for?

Our Mobile Broadband solution is an ideal option for businesses requiring an alternative to fixed line connectivity:

- Fast deployment requirements such as pre-Broadband data access, awaiting installation of a fixed line
- Remote locations where there are limited options for standard business broadband
- Short term installations e.g. pop up shops, building sites, festivals and events
- Cost effective back-up solutions as an alternative to a second fixed line

## Key Benefits

With a range of contract length and data bundle options, Mobile Broadband offers the flexibility to meet our customers' ever changing business needs.

The ease and speed of delivery makes it an ideal solution for rapid deployments, remote locations, temporary use or as a fixed line alternative. Mobile Broadband is one of the most versatile options for connectivity available.

### FLEXIBILITY

- A wide range of flexible contract terms & data bundle options available
- Ideal for businesses looking for short term installations such as pop up stores or construction sites

### SIMPLE DEPLOYMENT

- Provided with a 4G/4G+ or 5G router, pre-configured to your specification and ready to connect to the Internet
- Simply power on and connect via WiFi or to your network equipment for fast Internet access

### WIDE RANGE COVERAGE

- Use of the wide ranging O2, Vodafone & EE mobile networks
- Download speeds up to 60Mbps on 4G and 200Mbps on 5G

## Why Spitfire?

Spitfire have been providing connectivity solutions to business customers for over 20 years and appreciate the differences between business and consumer use.

Mobile Broadband business solutions combine high bandwidth with cost effective data packages and swift deployment to offer a realistic alternative to a fixed line broadband connection.

Every customer requirement will be unique and our Account Managers are equipped with the skills and knowledge to build a solution for a multitude of business scenarios, whether your requirements are timescale or performance focussed, or both.

### SIM ONLY OR MANAGED ROUTER

- Compact 4G/4G+ or 5G router with WiFi
- External antenna and outdoor enclosures available
