

Connectivity

Dedicated Fibre Ethernet

With superfast speeds reaching an incredible 10Gbps, Spitfire Fibre Ethernet is the undisputed champion of UK Internet connectivity.

It is the fastest, most scalable and reliable connection around – making it the ultimate choice for businesses that demand the best. Choose Dedicated Fibre Ethernet from Spitfire and a premium service is delivered by way of unsurpassed performance, uptime and repair SLAs.

Orca
[Orcinus orca]

Orcas are apex predators with a diverse diet. Apex connectivity of up to ten Gigabits per second.

Performance

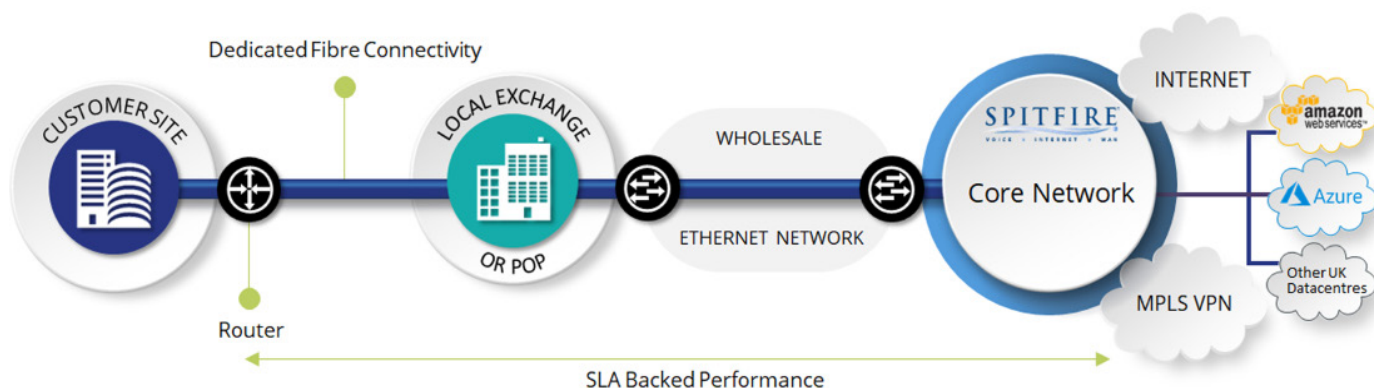

Thanks to market-leading performance targets for packet loss, delay and jitter, all Spitfire Fibre Ethernet circuits are suitable for carrying mission critical applications, voice and video. Now it is more affordable, it's perfect for companies who are heavily reliant on cloud applications and services.

With dedicated data speeds ranging from 10Mbps through to 10Gbps, ultra-low latency and high uptime availability, Fibre Ethernet is the best high speed leased line Internet circuit available.

Resilience

We are one of the leading suppliers of Ethernet in the UK and have partnerships with nine different wholesale carriers. This means that for your specific site we can identify which is likely to be installed the fastest and at the most competitive price.

What's more, when combined with Spitfire's fully resilient multi-node core network ring, we can design a solution which provides different core node termination for primary and backup circuits that you have with us, offering unsurpassed business continuity options at market leading prices.

Key Benefits

We understand that as business operations become more dependent on the cloud, there is a need for faster, more reliable connectivity.

Any downtime can be damaging to your business so we have a range of backup connectivity options available. Our IP engineering specialists can help design bespoke resilient solutions to meet your business needs and budget, such as diversely routed Fibre Ethernet

Spitfire Fibre Ethernet is an ideal service to combine with Spitfire SIP Trunks, providing a full end-to-end converged voice and data solution backed up by market leading SLAs.

INDUSTRY LEADING SLAs

- 100% bandwidth throughput
- 100% target uptime
- 5 hour fix time
- 24/7 monitoring
- All backed up by Service Credits

AVAILABILITY AND PRICE

- 6 leading wholesale access providers
- Covering the whole of the UK
- Tens of thousands of buildings already on-net providing fast installation
- Market-leading pricing

RESILIENT CORE NETWORK

- 4 x Network Nodes
- 2 x leading hardware vendors - Cisco & Juniper, for maximum resiliency
- Resilient fibre ring
- IPv4 and IPv6

CONSULTATIVE APPROACH

- Dedicated account manager
- UK-based technical support team
- Full project management
- Over 30 years' experience

Who is it for?

Historically Fibre Ethernet was deemed too expensive for many businesses. With lower prices and improved availability it has become a viable option for most SMEs, benefitting businesses who are:

- Migrating to Cloud or online services
- Using mission critical applications
- Looking to implement converged voice and data solutions

With Quality of Service (QoS) on every converged solution sold we can ensure optimum call quality using a Spitfire telephony service.

BT WHOLESALE AND COLT	
CRITERIA	SLA TARGETS
Uptime availability	100%
Packet loss	Maximum of 0.01%
Latency	Maximum of <10 ms
Jitter	Maximum of <3 ms
