

# Yealink VoIP Handset

## Daisy Chaining Information Sheet

Yealink VoIP Handset (front)  
Please note your model may vary.

**OPTIONAL**  
Power Supply Unit (PSU)  
Required if site does NOT  
have a Power Over  
Ethernet (PoE) Switch.

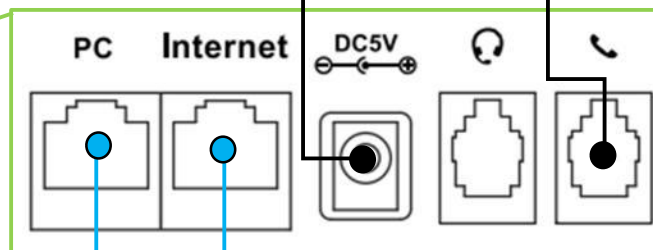

Receiver

Curly cord  
Used to connect  
the VoIP Handset  
to the Receiver.

Yealink VoIP Handset (back)

Ethernet/Network cable  
Used to connect the VoIP  
Handset to the PC.

Ethernet/Network cable  
Used to connect the VoIP  
Handset to the network.

**Computer/ Laptop**  
The network cable can be connected from the  
phone to the device in a "daisy chain"  
fashion.  
Thus allowing both phone and device to  
connect to network.

**Network Floor/Wall Port**  
These are patched in to your  
comms room and the network.

You may need to discuss this setup with your IT as they may have preconfigured network settings.
